JUAN MANUEL DAZA

AI Engineering Leader | Systems Architecture & Full Stack

• Buenos Aires, Argentina

juanmanueldaza@gmail.com | daza.ar | github.com/juanmanueldaza | linkedin.com/in/juanmanueldaza

PROFESSIONAL SUMMARY

AI Engineering Leader specialized in production-grade AI systems, full-stack architecture, and technical team enablement. Currently an **AI LLM Technology Architecture Senior Analyst at Accenture**, architecting and deploying multi-agent systems with LangGraph, LangChain, and Azure OpenAI at enterprise scale.

My edge: deep full-stack engineering (Python, React, PHP, MySQL) combined with AI/LLM expertise and a builder mindset proven through multiple open-source projects from zero to production. Journalism background gives me the communication and product vision to translate between technical complexity and business goals.

- **Systems Architecture at Scale**: Multi-agent orchestration, RAG pipelines, enterprise LLM integration - designed and deployed for Accenture's global operations.
- **Full Stack Depth**: Python (FastAPI, Django), React, PHP (CodeIgniter), MySQL - I own the entire stack.
- **Technical Leadership**: Led organization-wide AI adoption (160+ engineers trained), drove critical infrastructure migrations, defined development standards for LLM integration.
- **Builder / Co-founder Mentality**: Creator of linkedin2md (5k+ PyPI downloads), NERV framework, and invencible - all GPL-2.0 open-source projects built from scratch.

EXPERIENCE

AI LLM Technology Architecture Senior Analyst — Accenture Argentina

Feb 2026 - Present | Argentina (Hybrid)

- Architect and deploy **multi-agent AI systems** using **LangGraph, LangChain, Claude, Gemini, and Azure OpenAI** - enterprise-scale reasoning loops, structured outputs, and RAG pipelines.
- Design **MCP (Model Context Protocol)** servers connecting LLMs to structured tools and data sources, enabling agent-to-agent communication at scale.
- Implement **SSE (Server-Sent Events)** for real-time streaming of LLM responses and agent state updates.
- Optimize system architecture for latency, reliability, and cost - reducing error rates across production agentic workflows.
- Collaborate with global technical leads to define **architecture standards and security guidelines** for enterprise LLM integration.

Packaged App Development Senior Analyst — Accenture Argentina

Feb 2025 - Feb 2026 | Argentina

- Led a critical frontend infrastructure migration from Webpack to **Vite**, achieving a **3x-4x reduction in build and deployment times** across the division.
- Drove organization-wide generative AI adoption by designing and delivering **GitHub Copilot knowledge transfer workshops for 160+ engineers**.
- Integrated automated security scans, dependency updates, and code-quality gates into sprint cycles.

Full Stack Developer — Camba - Laboratorio de Tecnologia

Jan 2024 - Feb 2025 | Buenos Aires Province, Argentina

- Developed and maintained scalable web applications using **PHP, CodeIgniter, MySQL, and Docker**, coordinating with open-source communities and music industry stakeholders.
- Built accessible, user-centric tools serving diverse audiences across Argentina.

Frontend Developer — Camba - Laboratorio de Tecnologia

Oct 2022 - Jul 2024 | Buenos Aires, Argentina

- Spearheaded a complete frontend modernization of a legacy insurance platform to **Vue 3, Pinia, and Axios**, optimizing state management and API communication.
- Reconstructed UI/UX using **PrimeVue**, bringing enterprise tooling to modern responsive standards.

Full Stack and Frontend Developer (Freelance)

Mar 2021 - Oct 2022 | Various Companies

- Skydropx: Built HR knowledge platform using Node.js, TypeScript, and Vue 3.
- GPE Sistemas: Standardized NestJS as backend framework for microservices; built IoT integrations.
- Teambre9: Interactive MVP for custom sportswear design using Three.js (3D) and JavaScript.

Journalist, Editor and Publisher

2006 - 2019 | Buenos Aires and Santiago, Chile

- Contributor to Diario Clarin (Revista N), Rolling Stone, Pagina/12. Founder of independent publishing house (30+ titles).

SKILLS

PROJECTS

- **invencible** | *Creator and Maintainer* - Persistent multi-session memory infrastructure for AI agents. SQLite/stdio-MCP hub. GPL-2.0.
- **NERV** | *Creator and Architect* - Multi-agent orchestration framework. GPL-2.0.
- **linkedin2md** | *Creator and Maintainer* - Zero-dependency Python CLI. 5k+ PyPI downloads. GPL-2.0.

EDUCATION

- Acamica: Full Stack Web Developer (2020 - 2021)
- UNTREF: Electronic Arts (Coursework, 2019 - 2020)
- UBA: Literature (Coursework, 2004 - 2010)
- TEA: Journalism (Degree, 2003 - 2005)

LANGUAGES

- Spanish: Native
- English: Native / Bilingual
