JUAN MANUEL DAZA

Full Stack AI Engineer | AI LLM Technology Architecture @ Accenture
Buenos Aires, Argentina (EU / Spanish Citizenship)
juanmanueldaza@gmail.com | +54 9 11 ... | daza.ar | github.com/juanmanueldaza | linkedin.com/in/juanmanueldaza

PROFESSIONAL SUMMARY

Highly proactive and strategic **Full Stack AI Engineer** with deep expertise in designing, building, and deploying **Agentic AI systems**, advanced LLM architectures, and robust web applications. Currently an **AI LLM Technology Architecture Senior Analyst at Accenture**, leading the implementation of production-grade AI agents, LangChain/LangGraph systems, and developer experience (DevEx) optimizations.

- **EU / Spanish Citizenship**: Eligible for immediate, hassle-free relocation and employment across Spain and the European Economic Area (no visa sponsorship required).
- **Engineering Excellence**: Proven track record of managing complex migrations (achieving 4x build-time reductions at Accenture) and microservice standards.
- **AI Adoption Leader**: Actively mentored and coached over 160+ developers on integrating GitHub Copilot and generative AI tooling into their daily workflows.
- **Multidisciplinary Background**: Combines solid technical depth in TypeScript, Python, Node.js, and modern frameworks with a distinguished former career as a **Journalist & Cultural Publisher** (Clarín, Rolling Stone). This rare background enables unique structured prompt-engineering, highly logical reasoning loops for AI agents, and world-class stakeholder communication.

EXPERIENCE

AI LLM Technology Architecture Senior Analyst | Accenture Argentina

Feb 2026 – Present | Argentina (Hybrid) ** Design, architect, and deploy purpose-specific* ***AI agents and multi-agent systems*** *using* ***LangGraph, LangChain, and OpenAI/Azure OpenAI APIs*** *to automate complex corporate workflows. * Optimize reasoning loops, prompt structures, and RAG pipelines, reducing latency and error rates in enterprise AI agents. * Collaborate with global technical leads to define development standards and security guidelines for LLM integration.*

Packaged App Development Senior Analyst | Accenture Argentina

Feb 2025 – Feb 2026 | Argentina ** Led a critical frontend infrastructure migration from Webpack to* ***Vite****, achieving a* ***3x–4x reduction in build and deployment times*** *and boosting development velocity across the division. * Pioneered organization-wide generative AI adoption by designing and delivering comprehensive* ***GitHub Copilot knowledge transfer workshops for 160+ colleagues****. * Shifted team workflows from reactive to proactive by integrating automated security scans, dependency updates, and automated code-quality checks directly into sprint cycles.*

Full Stack Developer @INAMU & DW Akademie | Cambá - Laboratorio de Tecnología

Jan 2024 – Feb 2025 | Buenos Aires Province, Argentina ** Developed and maintained scalable web features for* ***INAMU*** *(Instituto Nacional de la Música) and* ***DW Akademie*** *(Colmena Software) using PHP, CodeIgniter, MySQL, and Docker. * Coordinated with open-source software communities and music industry groups to deliver highly accessible, user-centric tools.*

Frontend Developer @AdminSE | Cambá - Laboratorio de Tecnología

Oct 2022 – Jul 2024 | Buenos Aires, Argentina ** Spearheaded the complete frontend modernization of a legacy insurance software to* ***Vue 3, Pinia, and Axios****, optimizing state management and API communication. * Reconstructed the UI/UX using* ***PrimeVue****, aligning the enterprise tool with modern responsive standards.*

Full Stack & Frontend Developer (Freelance & Past Roles)

Mar 2021 – Oct 2022 | Various Companies ** **Skydropx**: Built a proof-of-concept HR wiki using Node.js, TypeScript, Vue 3, and Wiki.js, streamlining internal knowledge transfer. * **GPE Sistemas**: Standardized **NestJS** as the main backend framework*

*for microservices and built scalable IoT integrations with LoraWan and Chirpstack. * **Teambre9**: Created an interactive MVP for a custom sports t-shirt design platform using **Three.js** (3D) and JavaScript.*

Journalist, Editor & Cultural Publisher (The Journalism Era)

***Jan 2006 – Nov 2019 | Buenos Aires, Argentina & Santiago, Chile** * **Music & Culture Journalist**: Contributed high-impact features, show coverages, and artist interviews for leading media outlets including **Diario Clarín (Revista Ñ, Suplemento Sí), Rolling Stone, Página/12, and Editorial Perfil (Revista Hombre)**. * **Founder & Editor @ Editorial CILC**: Established and directed an independent publishing house, overseeing editing, curation, and logistics for 30+ contemporary poetry and literature titles. * **Tour Manager & Press Strategist @ Capitán Cobalto**: Managed public relations, tour logistics, and music festivals (Festival Indiprovi) in Chile and Argentina.*

SKILLS

- **AI & LLMs**: Agentic AI Architectures, Multi-Agent Orchestration, LangChain, LangGraph, Prompt Engineering, Azure OpenAI, RAG, GitHub Copilot Training
- **Languages**: JavaScript (ES6+), TypeScript, Python, PHP, Bash, Go (basic)
- **Backend & APIs**: Node.js, NestJS, Express.js, Django, FastAPI, CodeIgniter, REST APIs, GraphQL, Microservices, MongoDB, MySQL
- **Frontend**: Vue.js (Vue 3, Pinia, Vuex), React.js, Three.js, PrimeVue, HTML5, CSS3, SCSS, Responsive Web Design
- **DevOps & Cloud**: Docker, Git, GitHub Actions, GitLab CI, Azure DevOps, Linux (Ubuntu), AWS Lambda

PROJECTS

- **invencible** | *Creator & Maintainer* Invisible engineering infrastructure for AI agents that brings persistent multi-session memory, machine-readable coding standards (AgentSkills.io standard), and direct Agent-to-Agent (A2A) task delegation to Claude Code and GitHub Copilot CLI via a local shared SQLite/stdio-MCP hub. Implements Spec-Driven Development (SDD) pipelines and "Judgment Day" dual-model adversarial code reviews.
- **NERV** | *Creator & Architect* An advanced multi-agent orchestration framework acting as Mission Control to coordinate specialized, autonomous subagents (explorers, proposers, designers, planners, verifiers) for automated software engineering workflows, complete with custom slash commands and GitHub integration.
- **linkedin2md** | *Creator & Maintainer* An open-source, zero-dependency Python CLI tool that parses and transforms raw LinkedIn data exports into clean, structured, LLM-optimized Markdown files for prompt context injection and career intelligence modeling.

EDUCATION

- **Acámica**: Desarrollador Web Fullstack (2020 – 2021)
- **Universidad Nacional de Tres de Febrero**: Licenciado en Artes Electrónicas (Coursework completed, 2019 – 2020)
- **Universidad de Buenos Aires**: Licenciado en Letras (Coursework, 2004 – 2010)
- **Tea**: Periodista (Degree completed, 2003 – 2005)

LANGUAGES

- **Spanish**: Native proficiency
- **English**: Native or bilingual proficiency (Excellent spoken and written communication)

RECOMMENDATIONS

- *"Juan quickly builds strong relationships, brings curiosity and creativity to every challenge, and leaves a lasting impact wherever he goes."* — **Nicolás Doallo, Cambá**
- *"He played a key role in the complete frontend migration, demonstrating remarkable professional growth."* — **Sebastian Schuartzman, AdminSE**

- *"Juan is a proactive cultural leader with an admirable creative drive, equally skilled at enriching projects and narratives."* — **Marysabel Sánchez Bouttó, Publicis Groupe**
